

COMPANY OVERVIEW

Haven Technologies Inc. is a U.S. software development firm that builds custom software, AI assistants, and workflow automation for public agencies, institutions, healthcare organizations, and businesses. We replace manual, repetitive processes — intake, case processing, scheduling, records, and reporting — with systems the client owns outright, delivered under fixed-scope pricing with weekly demos and full documentation.

CORE COMPETENCIES

- Custom software development
- Workflow and business process automation
- AI assistants, chatbots, and intake
- Case management and resident-facing portals
- Legacy system modernization and integration
- Operations dashboards and reporting

DIFFERENTIATORS

- Fixed-price proposals with written change control
- You own the code, the data, and the cloud accounts
- Audit logs and role-based access by default
- Section 508-aware interfaces, in English and Spanish
- Documentation written for oversight and handover
